

Anti-Ransomware Assurance Suite

Morphisec fortifies your organization by diminishing the blast radius of attacks, to preemptively reduce the organization's exposure to cyber risk, pro-actively prevent advanced threats, and ensure optimal anti-ransomware defense. Powered by **Automated Moving Target Defense (AMTD)**, this streamlined solution effortlessly integrates with your current endpoint protection array, enhancing existing protection capabilities or standing strong independently when necessary.

Adaptive Exposure Management

Infiltration Protection

Impact Protection

Adaptive Recovery

Morphisec is a cloud delivered, operationally efficient solution that prevents advanced threats without additional staffing or performance impact.

Adaptive Exposure Management

Elevate your security posture with Adaptive Exposure Management that prioritizes vulnerabilities, automates the assessment of your security controls, identifies high-risk software, and addresses security misconfigurations.

Infiltration Protection

Enhance your cybersecurity resilience with Morphisec's prevention-first technology that continually changes the attack surface, rendering the target unpredictable, making it harder for attackers to exploit vulnerabilities.

Impact Protection

Augment your cybersecurity with dedicated Anti-Ransomware protection that proactively defends critical assets and data with a prevention-first strategy, minimizing recovery times and strengthening your anti-ransomware stance.

Adaptive Recovery

Recover encrypted files, maintain visibility into an attack's progression and strengthen defenses against future threats with Data Recovery and Forensic Recovery capabilities.

Benefits

- + **Proactive Threat Prevention:** Stop ransomware and advanced threats before they can execute, with prevention-first deceptive technology that disrupts attack chains, and blocks evasive or zero-day threats in real-time.
- + **Comprehensive Endpoint Protection:** Powered by deception and Automated Moving Target Defense (AMTD) technology, Morphisec augments other security products, making the endpoint unpredictable and unexploitable to the threat actor by dynamically and continuously shifting the attack surface on the endpoints, while neutralizing fileless, in-memory, and zero-day attacks.
- + **Simple and Scalable Deployment:** Deploy lightweight agents effortlessly across Windows and Linux environments, including legacy systems, with minimal resource impact, no restart required, and no configuration needed. Simply deploy the protector agent with any RMM solution, ready to protect advanced threats out-of-the-box.
- + **Reduced Operational Costs:** Preventing attacks early minimizes incident investigation, recovery, and response costs, allowing your team to focus on strategic priorities while reducing the total cost of ownership (TCO).
- + **Enhanced Visibility and Control:** Gain continuous insights into vulnerabilities, misconfigurations, shadow IT, risky software and browser extension and inventory as well as Identity and user risk, ensuring your security posture stays ahead of evolving threats and ransomware TTPs.
- + **Adaptive & Resilient Business Continuity:** Ensure uninterrupted operations, minimal business or brand impact and critical asset protection all backed by a 100% Ransomware-Free Guarantee.

About Morphisec

Founded in 2014, Morphisec, a pioneer in blast radius resiliency, keeps your business safe by intelligently anticipating and neutralizing threats - minimizing the impact and blast radius of cyber incidents and ensuring uninterrupted business operations without the need for constant tech team intervention or impact to performance.

Powered by Automated Moving Target Defense (AMTD) technology, the next evolution of cybersecurity, Morphisec protects over 7,000 organizations across nine million Windows and Linux endpoints, servers and workloads. Morphisec stops thousands of advanced attacks daily at Lenovo/Motorola, TruGreen, Cipla, Citizens Medical Center, and many more. Learn more at www.morphisec.com
