Trap Zone Active Deception Layer

Legend (Key Elements)

Bridge & Gate I IAM/PAM (Access Control)
Access control layer where IAM/PAM systems and gateways validate users and enforce secure authentication.

Walls I Endpoint Detection and Response (EDR)
Perimeter defense that detects, analyzes, and contains endpoint threats.

Moat I Network Detection and Response (NDR)
Monitors network traffic around the fortress to identify and block lateral movement.

Surveillance Towers I Detection & Monitoring
Provides real-time visibility inside and outside the fortress for rapid threat response.

Exposure Management
Highlights visibility gaps and strengthens overall defense posture.

Deception Layer I Decoys and Lures
Diverts attackers using fake assets and triggers deception-based alerts.

Trap Zone I Active Deception Layer
Intercepts and isolates attackers before they reach critical assets.

Critical Asset Defence I AMTD Core
Secures the most valuable systems with Morphisec's AMTD technology, keeping them untouched and invisible.
